

Education

Full Sail University (2010 - 2012)
B.S. in Web Design & Development

Work History

Designzillas (2012 - Present)

- Hired as intern (no moneys)
- Promoted to full-time Web Developer (moneys!)
- Title changed to Mobile Application Developer
- Promoted to Team Lead / Lead Engineer
- Launched Wishpedia website & mobile application (Titanium iOS)
- Employee of the month (October 2013)
- Employee of the year (2013)
- Launching Chosen mobile application (Titanium iOS/Android)
- Launching Lightboy mobile application (native iOS)
- Revamped Designzillas website (front-end dev)
- Currently working on a few front-end web development projects (Drupal, Wordpress)

Skills

- Object-oriented programming
- Experience with most popular MVC frameworks (Laravel, FuelPHP, Rails)
- Modular CSS
- Using Grunt
- Git master (not really, but I'm extremely comfortable with the CLI)
- Played around with Github pages (hence my ugly, incomplete portfolio site)
- Comfortable in front-end frameworks (AngularJS, Backbone, etc.)
- Strong Javascript skills
- Taught myself native iOS development (Objective-C, Swift)
- Strong UI/UX design knowledge (patterns and concepts, not so much designing in Photoshop)
- Strong strategic skills
- Lots of project management experience
- Great at organizing large, complex projects in Jira
- Love to help others, good at teaching/guiding
